A Stubborn Woman.

We read that when Jove had the ordering of mundane affairs, he promised to send rain on any day that would be agreed upon by the whole world. It was reported at last that they were all ready for rain at a certain date, except one old woman, who wanted to make soap on that particular day. Women are often accused of being capricious and whimsical; but there is one point on which they will all agree—the desirability of being well, and looking well. Every woman, be she young or old, always wants to look her best; and in order to do this, it is necessary to attain that state of health which will impart a sparkle to the eye, a bloom to the cheek, and grace and symmetry to her entire form. Dr. Pierce's Favorite Prescription is a panacea for all chronic "woman's troubles" and derangements of function peculiar to the sex, and is beyond all comparison the great healer of women.
